Material	Base pass shader
M_Penguin	191
M_Master_opaque_normal	208
M_Master_opaque	198
M_Master_CLR	344
M_Igloo	189
M_Master_opaque_emissive	198
M_Deafult	1016
M_Transmission	362
BasicShapeMaterial	186
M_Master_transparent	196
M_Wood_Walnut	210

Gdy wyższy słupki to materiał jest cięższy obliczeniowo, ilość instrukcji shadera które GPU musi wykonać dla każdego piksela obiektu

Bardziej zaawansowany wizualnie nie znaczy, że też droższy. Tekstury, dodatkowe maski, dodatkowe jakieś funkcje, wszystko ma znaczenie i może obciążać.

Deafult jest tak bardzo 'ciężki' obliczeniowo, bo jest bardzo uniwersalny. Ma różne funkcje (obliczenia oświetlenia, różne modele cieniowania itp.) co najzwyczajniej zwiększa jego koszty.
